

If you want to order a new charger for your SmartMover battery, it is important to know the variant of your battery. You see, we have different types of batteries and thus different types of chargers.

First and foremost, you must take a look at the top of your battery, and then the plug. These two combined show what type of charger you need.

Below you can see an overview of which types of batteries fit which type of chargers:

**Charger - DX battery**  
**Part number: 20122**

**Charger - jack plug**  
**Part number: 20119**

**Charger - plug with 3 legs**  
**Part number: 20132**
